

# WEB-SERVER PULL REQUEST

## 1 -> HTML and CSS file on the root

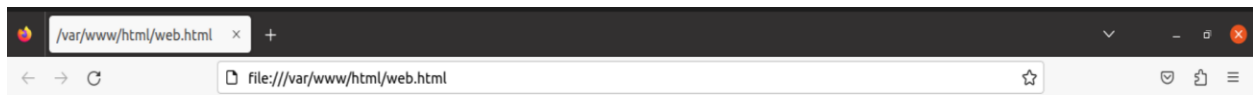

A terminal window with a dark purple background. The prompt is 'dark@dark-VirtualBox: /var/www/html\$'. The command 'ls' has been executed, and the output is 'index.html index.nginx-debian.html style.css web.html'. The prompt is now 'dark@dark-VirtualBox: /var/www/html\$' with a cursor.

```
dark@dark-VirtualBox: /var/www/html$ ls
index.html index.nginx-debian.html style.css web.html
dark@dark-VirtualBox: /var/www/html$
```

Web.html

Style.css

## 2-> Hosted Website

**Welcome to my website**

This is a simple website built using HTML and CSS
